

WFH 2020 - 8effe

The designed living space represents a balance between everyday life and work. Created for two people who value a functional space that easily adapts to their changing activities and needs.

On the perimeter of the rectangular apartment, a kitchen, living room and bedroom are located. Dominant is located in the central part of the apartment - designed on a circle, is the most important point and a specific cycle of everyday life and work. In it there is a large table and a convenient space planned around the periphery for storing documents, books, etc. Here, depending on the needs of residents, the space changes as it can be seen on isometry and visualizations.
